Special Remarks

This is a 2001 UD Trucks large bus. This Nissan UD Space Runner large bus is a KL-UA45 series, 76-seater, front-middle non-step bus (also known as G type), with front folding automatic doors, middle sliding automatic doors, air suspension on all wheels, and manual transmission. This large bus was used on public roads, and wheelchairs can board through the middle door. There is also a storage space for wheelchair equipment and tools. How about using this bus as a shuttle bus for driving schools and other facilities operated by large facilities or schools? There are drainage holes in the floor, so it should be easy to clean. *The meter has been replaced (375,152 km at the time of meter replacement). We are offering test drives to check the actual vehicle. Please feel free to contact us!
